---

## Summary

UI/UX Designer with a frontend development background, offering a rare blend of design thinking and technical execution. Proficient in Figma, from wireframes and user flows to high-fidelity prototypes. Experienced designing for web and mobile across real products, with a strong eye for visual consistency, spacing, and user-centered detail. Comfortable collaborating with developers and product teams in remote environments.

---

## Experience

**UI/UX Designer & Frontend Developer** | AZOOCA INC. - California, USA (remote) · Oct 2022 - Feb 2023

- Owned the end-to-end design-to-development workflow: translated product requirements into Figma designs, then implemented them in React and TailwindCSS.
- Designed and refined user flows for complex trading and banking features, ensuring intuitive navigation and visual clarity throughout.
- Conducted iterative UI improvements based on product feedback, maintaining consistency across dashboards and web app modules.
- Collaborated closely with product managers and designers in an async remote setup, contributing to a coherent and on-brand user experience.

**Visual Designer** | MARKETING MINDS - Lahore, Pakistan · Aug 2024 - Nov 2024

- Designed high-impact visual assets for digital campaigns across web and social platforms, balancing brand guidelines with engagement-driven aesthetics.
- Produced motion graphics and short-form video content, applying UX principles to ensure clear communication and audience flow.
- Maintained design consistency across all brand touchpoints, building and managing a shared visual asset library.

**Frontend Developer Intern** | GRAFFITECS - Dubai, UAE (remote) · Aug 2022 - Sep 2022

- Recreated responsive interfaces in React with pixel-accurate layout and spacing, directly informed by Figma design files.

---

## Design Projects

**UI/UX Portfolio** · [imannfazal.github.io/iman-portfolio](https://imannfazal.github.io/iman-portfolio)

- Curated case studies covering web and mobile UI design, Figma prototypes, and personal design projects - demonstrating full design process from concept to high-fidelity.

**B2B Wholesale Platform** · UI Design + Frontend (React, FastAPI) · Jan 2026 - Present

- Designed the full UI component system and dashboard layout in Figma before building in React, applying UX principles around hierarchy, flow, and usability.

**Workflow Automation System** · UX Design + React, Flask · Dec 2025 - Present

- Designed role-based user flows and interface states for a task management platform, then implemented real-time dynamic UI in React.
-

## Skills

**Design:** Figma (wireframes, prototypes, high-fidelity), User Flows, UX Research, Responsive Design, Visual Design, Brand Consistency

**Frontend (bonus):** React.js, Next.js, TypeScript, TailwindCSS, HTML, CSS

**Tools:** Git, GitHub, Agile workflows

---

## Education

**BS Software Engineering** · University of the Punjab, Lahore · 2019 - 2023
